Changed width across flats of inner diameter of hex nut and diameter of orifice to correct the problem of lock hook interference with hex wrench.

* -D ⇒ Non-lubricant specification only. -□ ⇒ Select either blank (standard) or D (non-lubricant specification)

* The L dimension for the tapered thread types is a reference dimension when mated and tightened.

* Prices are the same.

Supply joint (assembly side)

List of models and their specifications

* See the following table for combinations of models of fittings, tube size, and thread size.

Regarding NCU specifications, the "←" indicates that the standard model can be used as NCU specifications, so order the standard model.

● The dimension diagram for the following **NCU** specifications and the **CS** specifications are the same as the standard model or the non-lubricant specifications. Refer to the dimension diagrams on pages ① to ⑩.

List of models and their specifications

* See the following table for combinations of models of fittings, tube size, and thread size.

Regarding NCU specifications, the "←" indicates that the standard model can be used as NCU specifications, so order the standard model.

● The dimension diagram for the following **NCU** specifications and the **CS** specifications are the same as the standard model or the non-lubricant specifications. Refer to the dimension diagrams on pages ① to ⑩.

● Tightening torque (reference value), sealant color, and gasket material for targeted models

Thread type	Thread size	Tightening torque N·m [in·lbf]	Sealant color	Gasket material
Metric thread	M5 × 0.8	1 to 1.5 [8.85 to 13.28]	—	SUS304
	M6 × 1	2 to 2.7 [17.70 to 23.90]		NBR
Tapered threads for pipes*	R1/8	4.5 to 6.5 [39.83 to 57.53]	White	—
	R1/4	7 to 9 [61.96 to 79.66]		
	R3/8	12.5 to 14.5 [110.64 to 128.34]		
	R1/2	20 to 22 [177.02 to 194.72]		

* The tightening torque is the same for all products with tapered threads for quick fitting pipes.

List of models and their specifications

* See the following table for combinations of models of fittings, tube size, and thread size.

Regarding NCU specifications, the "←" indicates that the standard model can be used as NCU specifications, so order the standard model.

- The dimension diagram for the following NCU specifications and the CS specifications are the same as the standard model or the non-lubricant specifications. Refer to the dimension diagrams on pages ① to ⑤.
